 DataGardener

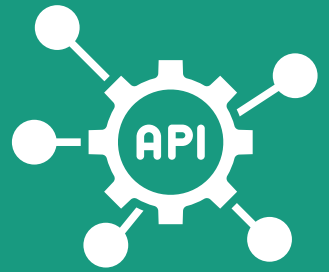

API Handbook

DataGardener

OUR API

Secure, programmatic access to the DataGardener business intelligence platform.

Integration-ready for embedding UK company, director, financial, property, and procurement data into your systems.

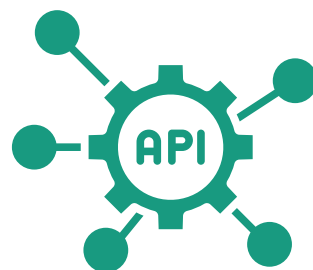

Designed For:

- Developers
- Analysts
- Compliance teams
- Decision-makers

Provides **accurate, real-time information** Helps to:

- Streamline processes
- Improve decision-making

Why the DataGardener API is Needed?

Save Time and Reduce Manual Work

Instead of visiting multiple data sources, downloading files, and manually compiling spreadsheets, our API delivers complete company and financial data in one automated request.

[Book a Call](#)

Improve Decision-Making

Instant access to verified company profiles, director records, and financial performance allows for quick, informed decisions in lending, procurement, and compliance.

Ensure Compliance and Reduce Risk

Our API supports **KYC** (Know Your Customer) and **AML** (Anti-Money Laundering) processes with data on legal filings, adverse events, and credit scores — helping you detect and avoid high-risk entities.

Seamless Integration Into Your Workflow

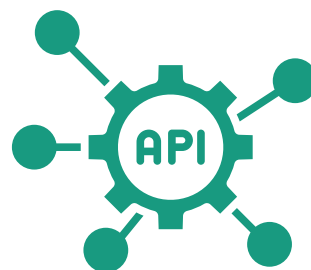

Integrates directly into CRMs, compliance tools, and analytics platforms — ensuring your team always works with the latest data without leaving your existing systems.

Scalable for Growth

From hundreds to millions of queries, the API grows with your needs without additional infrastructure investment.

In short: The DataGardener API is not just a data source—it's a business enablement tool that automates intelligence gathering, improves operational efficiency, and keeps your business compliant.

Contact Us

"We've had a really exciting first year with this new direct channel. We launched an MVP, with a small team of really enthusiastic and smart people who were willing to learn quickly, and we have had fantastic results. The volume of customer inquiries coming through the door has pretty much been doubling every month from day one."
